***November 1, 2017 – October 31, 2019  
Reporting Period***

***Prepared by:***

***the Genesee County Drain Commissioner SWM  
on behalf of Genesee County and contracted Communities***

This report summarizes activities completed for the period from November 1, 2017, to October 31, 2019, by the Genesee County Drain Commissioner's Office and the contracted Phase II Municipalities to meet the requirements of their National Pollutant Discharge Elimination System (NPDES) permit. This report is broken into six sections to coincide with the MI Waters website.

- **PPP**
- PEP
- IDEP
- Post Construction
- Good Housekeeping
- General Permit Requirements

To implement the permit requirements and perform watershed management planning, Genesee County established a Storm Water Management System for the entire County under the authority of Michigan Public Act 342 of 1939. Genesee County had designated the Genesee County Drain Commissioner's Office to be their authorized agent. Many of the communities in the County have

executed a contract to use the County 342 Storm Water Management System to provide Phase II permitting services.

Those Communities reporting November 1, 2019 are still under the Watershed permit. Those Communities that have their new Jurisdictional permit will be reporting April 1, 2020.

In 2015 those Communities on page 1 have a 2015-2020 342 contract to combine efforts on meeting permit requirements. An Ad-hock committee will be working 2019-2020 to prepare the next contract for the 2020-2025 cycle.

### **The PPP is Question 2 and 3 of your PERMIT APPLICATION.**

*3. The procedure for inviting public involvement and participation in the implementation and periodic review of the SWMP.*

Many of the Programs implemented through this permit on behalf of all the communities are implemented through private organizations and volunteers. Individual components solicit public involvement through promotion of that program. Programs are ongoing throughout the reporting cycle.

- Program implementation through partnerships:
  - Education Booth at various events throughout the County. Partner with Conservation district and volunteers to engage with public one on one.
  - Presentations on water quality are given to groups throughout the County. Partner with FRWC to promote and hold presentations
  - Get public on the water with canoe trips on the Flint River, education information provided by FRWC
  - Volunteers are trained by FRWC and used to perform benthic monitoring twice per year
  - School age watershed education
    - Project GREEN, students learn the how and why of chemical testing on the river. Volunteer mentors go into the classrooms to talk about water and train on how to do testing. School groups get together to discuss results.
    - Conservation District visits classrooms with water quality education program for students.
  - Use staff and volunteers to post signage
    - Volunteer Groups are educated in the how and why of Storm drain stenciling and with a guide from FRWC or Conservation District they will stencil neighborhood roads and hand educational door hangers.
    - County Staff install storm drain markers when they are working on storm drains.
    - Creek Crossing signs over major waterways have been placed and are being maintained by County Staff.

**\*detailed information on above programs can be found in the 2017-2019 PEP and General permit requirements**

**Past reports of implementation efforts are available on [www. GCDCSWM.com](http://www.GCDCSWM.com) for review and comment by the public at any time.**
